Portfolio Objective

The Imara MET Equity Fund is a general equity portfolio. The Fund largely mirrors the successful Imara Houseview investment policy and may consist of financially sound equity securities, property shares and property related securities listed on exchanges and assets in liquid form. In selecting securities for this portfolio, where possible, the manager shall seek to sustain high long-term capital growth.

Managers Comment

The fund continued to outperform its benchmark during the month with a return of 1.9% compared to the JSE All share return of -0.7%. Overall equity exposure has remained consistent relative to the previous month.

The global economy appears to be moving into an environment of low growth, but with more systemic stability. Current underlying growth has not changed much with Europe remaining in recession, the US economy still strengthening and China rebounding. Prospects appear more favourable now compared to 6 months ago and central bankers appear committed to avoid a flare-up in systemic risk.

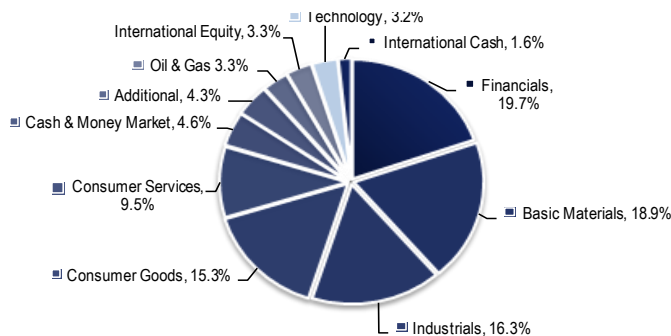

On the local front, the rand has weakened against the dollar moving from 8.40 to the dollar to 9.23 currently, a 10% drop since the beginning of the year. More importantly, the rand has weakened against other high yielding commodity currencies, indicating substantially negative sentiment and deteriorating fundamentals, particularly on the political and labour fronts. Investors remain on high alert regarding foreign inflows that are funding the current account deficit.

The JSE All Share is up 2.5% year to date accompanied by a substantial 13% increase in its Price Earnings ratio, indicating a rerating in the market partly driven by an expectation of a recovery in earnings on the mining front and outperformance by large capitalisation rand hedge stocks. We anticipate no further material rerating as the market appears expensive on a short term view.

Collective Investment Schemes (CIS) in securities are generally medium to long term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to the future. All CIS are traded at ruling prices and can engage in borrowing and scrip lending. A schedule of fees and charges and maximum commissions is available on request. Commission may be paid and if so, would be included in the overall costs. Forward pricing is used. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. MET Collective Investments Limited reserves the right to close and reopen certain portfolios from time to time in order to manage them more efficiently. The Fund may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Different classes of participatory interests apply to certain portfolios, which are subject to different fees and charges. Performance figures quoted are from Morningstar/MoneyMate, as at the date of this factsheet for a lump sum investment, using NAV-NAV prices with income distributions reinvested. Service charges and investment manager charges are calculated and accrued on the daily market value of the investment and paid out monthly. MET Collective Investments Limited is the Manager of the MET Collective Investments Scheme, and a full member of the Association for Savings and Investment SA. Total Expense Ratio (TER)

	Class A
Portfolio ongoing fee	1.50%
Portfolio costs	0.07%
TER - excluding performance fees	1.57%
Performance fees	0.00%
VAT	0.22%
Total TER - incl VAT	1.79%

Please note: the TER has been calculated using data from 1 January 2012 until 31 December 2012. The TER is disclosed as % of the average Net Asset Value of the portfolio that were incurred as charges, levies and fees related to the management of the portfolio and underlying portfolios. The TER is adjusted for significant subsequent portfolio restructurings and/or fee changes.

A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER can not be regarded as an indication of future TER's.
