The Total Expense Ratio (TER) has been calculated using data from 01 October 2013 until 30 September 2014. The TER is disclosed as the percentage of the average Net Asset Value of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio and underlying portfolios. The TER is calculated quarterly but may additionally be re-calculated with effect from any significant portfolio restructurings and/or fee changes occurring. A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's.

Performance figures quoted are from Morningstar, at the date of this fact sheet, for a lump sum investment, using NAV-NAV prices with income distributions reinvested. CPI/Inflation figures are lagged by one month. Performance data may not be displayed for recently launched funds as regulations governing the content of this factsheet preclude the publication of performance data for any fund/class that is less than 6 months old.

Collective Investment Schemes (CIS) in securities are generally medium- to long-term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to the future. All CIS are traded at ruling prices and can engage in borrowing and scrip lending. A schedule of fees and charges and maximum commissions is available on request from MET Collective Investments (RF) (Pty) Ltd. Commission may be paid and if so, would be included in the overall costs. Forward pricing is used. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. MET Collective Investments (RF) (Pty) Ltd reserves the right to close and reopen certain portfolios from time to time in order to manage them more efficiently. The fund may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Different classes of participatory interests apply to certain portfolios, which are subject to different fees and charges. The exposure limit to a single security, in certain specialist equity portfolios, can be greater than is permitted for other portfolios in terms of the Collective Investments Schemes Control Act.
