Policy

The primary objective of the Imara MET Balanced Fund is to offer investors an inflation-beating long term total return with a moderate risk profile. The portfolio will be managed in compliance with prudential investment guidelines for retirement funds in South Africa to the extent allowed for by the Act. In order to achieve its objective, the investments normally to be included in the portfolio may comprise a combination of assets in liquid form, money market instruments, interest bearing instruments, bonds, debentures, corporate debt, equity securities, property securities, preference shares, convertible equities, derivatives and non-equity securities. The manager may also invest in participatory interests or any other form of participation in portfolios of collective investment schemes or other similar collective investment schemes as the Act may allow from time to time, and which are consistent with the portfolio's investment policy. Where the aforementioned schemes are operated in territories other than South Africa, participatory interests or any other form of participation in portfolios of these schemes will be included in the portfolio only where the regulatory environment is, to the satisfaction of the manager and the trustee, of sufficient standard to provide investor protection at least equivalent to that in South Africa. The portfolio may from time to time invest in listed and unlisted financial instruments, in accordance with the provisions of the Act, and the Regulations thereto, as amended from time to time, in order to achieve the portfolio's investment objective. The manager may also include forward currency, interest rate and exchange rate swap transactions for efficient portfolio management purposes. The portfolio's net equity exposure will range between 0% and 75% of the portfolio's net asset value. The trustee shall ensure that the investment policy, as set out above, is adhered to, provided that nothing contained in the investment policy shall preclude the manager from varying the proportions of the aforementioned securities and assets in liquid form, or the assets themselves, should changing economic factors or market conditions so demand.
