Imara MET Income Fund is a portfolio of the MET Collective Investments Scheme and Atlantic Asset Management (Pty) Ltd, registration number: 2007/005723/07, an approved financial services provider (FSP) under the Financial Advisory and Intermediary Services Act (No. 37 of 2002), FSP number: 31756, is responsible for managing the assets of this portfolio. CIS are generally medium to long-term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to the future. CIS are traded at ruling prices and can engage in borrowing and scrip lending. The CIS may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Different classes of units apply to portfolios, which are subject to different fees and charges. A schedule of fees and charges and maximum commissions is available on request from the Manager. The Manager reserves the right to close and reopen certain portfolios from time to time in order to manage them more efficiently in accordance with their mandate. Portfolios are valued daily at approx. 15h00, latest prices can be viewed at www.metci.co.za. Forward pricing is used. Instructions must reach the Manager before 14h00 to ensure same-day value. The Manager retains full legal responsibility for all third party named CIS portfolios under the MET Collective Investments Scheme.

This portfolio is permitted to invest in foreign securities which, within portfolios, may have additional material risks, depending on the specific risks affecting that country, such as: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks; and potential limitations on the availability of market information. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. Investors are reminded that an investment in a currency other than their own may expose them to a foreign exchange risk.

The Total Expense Ratio (TER) has been calculated using data from 01 October 2014 until 30 September 2015. The TER is disclosed as a percentage of the average Net Asset Value of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio and underlying portfolios. The TER does not include transaction costs. The TER is calculated quarterly but may additionally be re-calculated with effect from any significant portfolio restructurings and/or fee changes occurring. A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's.

Performance is calculated for a portfolio/portfolio class. Individual investor returns may differ as a result of fees, actual date(s) of investment, date(s) of reinvestment of income and withholding tax. Annualised returns, also known as Compound Annualised Growth Rates (CAGR), are calculated from cumulative returns; they provide an indication of the average annual return achieved from an investment that was held for the stated time period. Actual annual figures are available from the Manager on request. Performance figures quoted are from Morningstar, as at 30/11/2015, for a lump sum investment, using NAV-NAV prices with income distributions reinvested on the ex-dividend date. CPI/Inflation figures, where present, are lagged by one month.
